**JURY TRIAL DEMANDED**

---

**ORIGINAL COMPLAINT FOR FALSE PATENT MARKING**

Relator GHJ Holdings, LLC (“Relator”) alleges as follows:

**NATURE OF THE CASE**

1. This is an action for false patent marking under section 292 of the Patent Act (35 U.S.C. §292), which provides that any person may sue to recover the civil penalty for false patent marking. Relator brings this qui tam action on behalf of the United States of America.

**PARTIES**

2. Relator is a Texas limited liability company with its principal place of business in Texarkana, Texas.

3. Defendant MWM Products is an assumed business name organized under the laws of the state of Oregon and may be served through its authorized representative, Helen Brown, 215 N. Evergreen Ct SE, Aumsville, Oregon 97325.

**JURISDICTION AND VENUE**

4. This Court has subject matter jurisdiction over Relator's false marking claims under Title 28 U.S.C. §§ 1331 and 1338(a).

5. This Court has personal jurisdiction over Defendant by virtue of, *inter alia*, Defendant's persistent and continuous contacts with the Eastern District of Texas, including active and regular conduct of business during the relevant time period through its sales in the Eastern District of Texas.

6. This Court has personal jurisdiction over Defendant because, *inter alia*, Defendant has violated Title 35 U.S.C. § 292, and falsely marked, advertised, distributed and sold products in the Eastern District of Texas. Further, on information and belief, Defendant has sold falsely marked products in competition with sellers of competitive products in the Eastern District of Texas. Such sales by Defendant are substantial, continuous and systematic.

7. Venue is proper in this District under Title 28 U.S.C. §§ 1391(b) and (c) and 1395(a).

**FACTS**

8. Defendant has marked and/or continues to mark its products, including, but not limited to, its L'Applique™ The Lotion Applicator and The Lotion Applicator Replacement Pads (collectively, the “Falsely Marked Products”) with expired and/or otherwise inapplicable patents, including at least U.S. Patent No. D297,467 (the “Expired Patents”).

9. Such false marking by Defendant includes marking the Expired Patents upon, affixing the expired and/or inapplicable patents to, and/or using the Expired Patents in advertising in connection with the Falsely Marked Products.

10. U.S. Patent No. D297,467 was filed December 12, 1985 and issued on August 30, 1988. It expired no later than August 30, 2002. Nevertheless, Defendant has marked one or more of the Falsely Marked Products with it after expiration.

11. U.S. Patent No. D297,467 was originally assigned to the inventor, Mark W. McCann. A search of the United States Patent and Trademark Office shows no assignments recorded.

12. Defendant has marked the Falsely Marked Products by printing the Expired Patents on the packaging of the Falsely Marked Products. Such markings could

have easily been updated to reflect accurate patent information. Defendant could have easily remarked its products to not include expired patent numbers, but decided not to.

13. It was a false statement for Defendant to mark the Falsely Marked Products with expired or otherwise inapplicable patents. Defendant knew that the patents were expired or otherwise inapplicable, but nevertheless marked them on its products after they expired or when they were clearly inapplicable in an attempt to deceive the public.

14. The expiration date of a U.S. Patent is not readily ascertainable by members of the public at the time of the product purchase. The patent number itself does not provide members of the public with the expiration date of the patent. Basic information about a patent, such as the filing, issue and priority dates associated with a particular U.S. patent number are available at, for example, the website of the United States Patent and Trademark Office (“USPTO”). However, access to the Internet is necessary to retrieve that information (meaning that a consumer may not have the ability to retrieve the information, especially while he is in a store making a purchasing decision) and even after retrieving that information, it does not always include the expiration date of a patent. Rather, a member of the public

must also conduct a burdensome legal analysis, requiring specific knowledge of U.S. Patent laws regarding patent term expiration. Notably, a correct calculation of the expiration date must also account for at least: a) any term extensions granted by the USPTO, which may or may not be present on the face of the patent, and b) whether or not the patent owner has paid the necessary maintenance fees.

15. Defendant knew that a patent that is expired does not cover any product.

16. Defendant knew that it was a false statement to mark the Falsely Marked Products with an expired or otherwise inapplicable patent.

17. Defendant did not have, and could not have had, a reasonable belief that its products were properly marked, and Defendant knew or should have known that the aforementioned patents had expired and/or were inapplicable.

### **INJURY IN FACT TO THE UNITED STATES**

18. Defendant's practice of false marking is injurious to the United States.

19. The false marking alleged above caused injuries to the sovereignty of the United States arising from Defendant's violations of federal law, specifically, the violation of 35 U.S.C. §292(a). The United States has conferred standing on "any person," which includes Relator, as the United States' assignee of the claims in this complaint to enforce section 292.

20. The false marking alleged above caused proprietary injuries to the United States, which, together with section 292, would provide another basis to confer standing on Relator as the United States' assignee.

21. The marking and false marking statutes exist to give the public notice of patent rights. Congress intended the public to rely on marking as a ready means of discerning the status of intellectual property embodied in an article of manufacture or design, such as the Falsely Marked Products.

22. Federal patent policy recognizes an important public interest in permitting full and free competition in the use of ideas that are, in reality, a part of the public domain—such as those described in the Expired Patents.

23. Congress' interest in preventing false marking was so great that it enacted a statute that sought to encourage private parties to enforce the statute. By permitting members of the public to bring *qui tam* suits on behalf of the government, Congress authorized private persons like Relator to help control false marking.

24. The acts of false marking alleged above deter innovation and stifle competition in the marketplace for at least the following reasons: if an article that is within the public domain is falsely marked, potential competitors may be

dissuaded from entering the same market; false marks may also deter scientific research when an inventor sees a mark and decides to forego continued research to avoid possible infringement; and false marking can cause unnecessary investment in design around or costs incurred to analyze the validity or enforceability of a patent whose number has been marked upon a product with which a competitor would like to compete.

25. The false marking alleged above misleads the public into believing that the Expired Patents give Defendant control of the Falsely Marked Products (as well as like products), placing the risk of determining whether the Falsely Marked Products are controlled by such patents on the public, thereby increasing the cost to the public of ascertaining who, if anyone, in fact controls the intellectual property embodied in the Falsely Marked Products.

26. Thus, in each instance where a representation is made that the Falsely Marked Products are protected by the Expired Patents, a member of the public desiring to participate in the market for products like the Falsely Marked Products must incur the cost of determining whether the involved patents are valid and enforceable. Failure to take on the costs of a reasonably competent search for information necessary to interpret each patent, investigation into prior art and other

information bearing on the quality of the patents, and analysis thereof can result in a finding of willful infringement, which may treble the damages an infringer would otherwise have to pay.

27. The false marking alleged in this case also creates a misleading impression that the Falsely Marked Products are technologically superior to previously available products, as articles bearing the term “patent” may be presumed to be novel, useful, and innovative.

28. Every person or company in the United States is a potential entrepreneur with respect to the process, machine, manufacture, or composition of matter described in the Expired Patents. Moreover, every person or company in the United States is a potential competitor with respect to the Falsely Marked Products marked with the Expired Patents.

29. Each Falsely Marked Product or advertisement thereof, because it is marked with or displays the Expired Patents, is likely to, or at least has the potential to, discourage or deter each person or company (itself or by its representatives), which views such marking from commercializing a competing product, even though the Expired Patents do nothing to prevent any person or company in the United States from competing in commercializing such products.

30. The false marking alleged in this case and/or advertising thereof has quelled competition with respect to similar products to an immeasurable extent, thereby causing harm to the United States in an amount that cannot be readily determined.

31. The false marking alleged in this case constitutes wrongful and illegal advertisement of a patent monopoly that does not exist and, as a result, has resulted in increasing, or at least maintaining, the market power or commercial success with respect to the Falsely Marked Products.

32. Each individual false marking (including each time an advertisement with such marking is accessed on the Internet) is likely to harm, or at least potentially harms, the public. Thus, each such false marking is a separate offense under 35 U.S.C. §292(a).

33. Each offense of false marking creates a proprietary interest of the United States in the penalty that may be recovered under 35 U.S.C. §292(b).

34. For at least the reasons stated in paragraphs 2 to 33 above, the false marking alleged in this case caused injuries to the sovereignty of the United States arising from violations of federal law and has caused proprietary injuries to the United States.

**CLAIM**

35. For the reasons stated in paragraphs 2 to 34 above, Defendant has violated section 292 of the Patent Act by falsely marking the Falsely Marked Products with intent to deceive the public.

**PRAYER FOR RELIEF**

36. Relator thus requests this Court, pursuant to 35 U.S.C. §292, to do the following:

- A. enter a judgment against Defendant and in favor of Relator that Defendant has violated 35 U.S.C. §292 by falsely marking products with knowledge that the patent has expired and/or are not applicable for the purpose of deceiving the public;
- B. order Defendant to pay a civil monetary fine of \$500 per false marking offense, or an alternative reasonable amount determined by the Court taking into consideration the total revenue and gross profit derived from the sale of falsely marked products and the degree of intent to falsely mark the products, one-half of which shall be paid to the United States and the other half to Relator;

C. enter a judgment declaring that this case is “exceptional,” under 35 U.S.C. §285 and award in favor of Relator, and against Defendant, the costs incurred by Relator in bringing and maintaining this action, including reasonable attorneys’ fees;

D. order that Defendant, its officers, agents, servants, employees, contractors, suppliers, and attorneys be enjoined from committing new acts of false patent marking and be required to cease all existing acts of false patent marking within 90 days; and

E. grant Relator such other and further relief as the Court may deem just and equitable.

**JURY DEMAND**

37. Relator demands a jury trial on all issues so triable.

Dated: February 16, 2011

Respectfully submitted,

/s/ Randall T. Garteiser
